IXLA
ID LASER SYSTEMS

Laser and Inkjet Perso Systems for Government and Payments

IDX is IXLA's response to the market demand for a compact, flexible and effective laser solution, alternative to traditional card printers in desktop applications.

Thanks to an innovative design, **IDX** offers a very compact footprint, without compromising the key features and function for a product in this segment: quality of engraving by new generation lasers, magstripe & contact/contactless encoding, CLI marking, 5" color status display, secured dual feeder and a concealed output bay.

The size and weight of **IDX** allow an easier deployment, requiring a small space and a single engineer to install, and also an easier support, where swap is an effective alternative to on-site calls.

IDX embeds in the most compact system in the market all flagship characteristics of IXLA branded products, from the outstanding quality and performance in the personalization process, to the renowned reliability and extended life in operations.

IXLA

ID LASER SYSTEMS

LASER MARKING

All IXLA systems allow front and rear engraving of photos, data, barcodes and graphic elements in non-tactile, embossed or indented modes.

Mictotext, CLI and ghost image are also available

Laser type options: DPSS, Fiber Laser

C/CLESS

Smartcard encoding. The system enables loading of personal data into the electronic contact or contactless chip.

DUAL SIDE

All IXLA systems provide dual sided printing

MAG STRIPE

In line Magnetic stripe reader can read/write 3 Track Magstripe per ISO 7810, 7811. 3TRK, Hi-Co/Lo-Co, ISO compliant

OCR, XY reg.

The integrated vision tools allow pre-personalization product inspection, quality control, barcode reading, offset registration of laser engraving data, OCR/OCV verification of personalized data.
