e-LINE

EVOLUTION
IN ACTION

IXLA introduces the next generation of its product portfolio. Built on the globally trusted foundation of IXLA systems, the new e-LINE represents a true **EVOLUTION** in decentralised issuance, offering speed, accuracy and personalisation for government ID and financial card applications. As identity documents continue to evolve and face new challenges, the IXLA e-LINE portfolio is designed to meet market demands with powerful, high-speed systems that do not compromise quality and reliability.

part of HID

Superior Quality

MOPA adjustable-pulse laser ensures sharp, secure personalisation with enhanced resolution to give the highest quality across multiple substrates.

Scalability

Fiber lasers with power options up to 30W adapting to evolving needs.

Higher Throughput

Upgraded electronics accelerate processing for higher-volume environments.
