LASER and INKJET PERSONALISATION SYSTEMS for GOVERNMENT and PAYMENTS

QA Image Capture
Tactile Engraving
Contact, Contactless Encoders
Multi-Chip Encoders
Higher Throughput & Quality
Finance
Seamless Integration
Counter Top & Cluster Issuance
Government
Vacuum System
Inline Lockable Reject Bin
Various Substrates
30W MOPA Laser
Polycarbonate ID Cards
Credit & Debit Cards
Lockable Feeder
CLI/MLI
Driving Licenses
Magnetic Encoding
Metal PVC, PET, PC

ID7-e is designed to deliver the maximum productivity and flexibility of the machines in the IXLA desktop range, offering **multi-chip encoding for contact and contactless, magnetic stripe encoding**, with **integrated dual feeder and optional dual stacker**. Featuring a 30W MOPA laser, advanced electronics and a new-generation card transport system, it delivers superior engraving quality, increased throughput and support for polycarbonate (PC), PVC and metal cards, for government ID and financial cards.
