LASER and INKJET PERSONALISATION SYSTEMS for GOVERNMENT and PAYMENTS

Compact Footprint

3rd Page Inkjet Printing

PC Inkjet Printing

Clustered Centralised Issuance

E-Passport Issuance

Laser Protected Inkjet (LPI)

Higher Throughput

Higher Quality

Non standard formats (ID-2, ID-1, tags)

Decentralised Issuance

Seamless Integration

Polycarbonate optimised

Laser + DoD

30 W MOPA Laser

Scalable Architecture

XPrint-e is a **laser and inkjet personalisation system** for **low-to-medium volume passport issuance**, designed for **government ID issuance**.

Evolving from the proven XPrint platform, **XPrint-e** integrates a **new 30W MOPA adjustable pulse laser** and the latest technology, delivering **sharper edges, improved greyscale quality, consistent personalisation and reliable throughput**. The system supports personalisation on **polycarbonate (PC) and paper substrates**, with **laser engraving on PC combined with inkjet printing on PC and/or paper**, ensuring maximum flexibility across passport designs.
